Evaluation Set Generation Agent

User

① "I want to evaluate the model across diverse scenarios, including **posters**, **natural scenes**, **products**, and..."

Specify Evaluation Scope

② **Adaptive Taxonomy**

Poster | Natural | Product | ...

Example:

Prompt	Evaluation Rubrics
"A Disney-style movie poster of a brave little lion cub."	• Character identity • Style • Scene correctness

Evaluation Set

Adaptive Post-Training Loop

① **Diagnosis Agent**

Instance-Level Analysis

Identity 95%
Text 85%
Style 70%
Scene 65%
...

Spatial 90%
Style 70%
Action 60%
Counting 15%

Evaluation Report

Poster
- Text Correctness 90
- Style Alignment 72
- Scene Correctness 41
- ...

Natural
- Aesthetic Quality 95
- ...

More...

② **RL Data Generation Agent**

Adaptive RL Prompt Distribution

Underperforming | Moderate | Mastered

- "A moving poster of a superhero flying..."
- "Two cats sitting on the table with ..."
- "A sign that showing Welcome ..."
- ...

Sampling

③ **RL Training** (DiffusionNFT/GRPO/...)

Updated Model → **Current Model** → **Evaluation Set**

Why APT (Agentic Post-Training)

Model-Agnostic

Lens | FLUX | SD3.5 | LongCat

Benchmark-Agnostic

GenEval1/2 | DPG | OneIG | CVTG

Architecture-Agnostic

Diffusion | Autoregressive

Fully Automated

~~Manually Curated Training Set~~
